

[EN] APN Configuration (required on Android)

Symptoms: Connected to the network but no internet access.

⚠ The location of these settings may vary slightly depending on your phone model or Android version.

1. Go to Connection settings:

Then go to "**Mobile networks**"

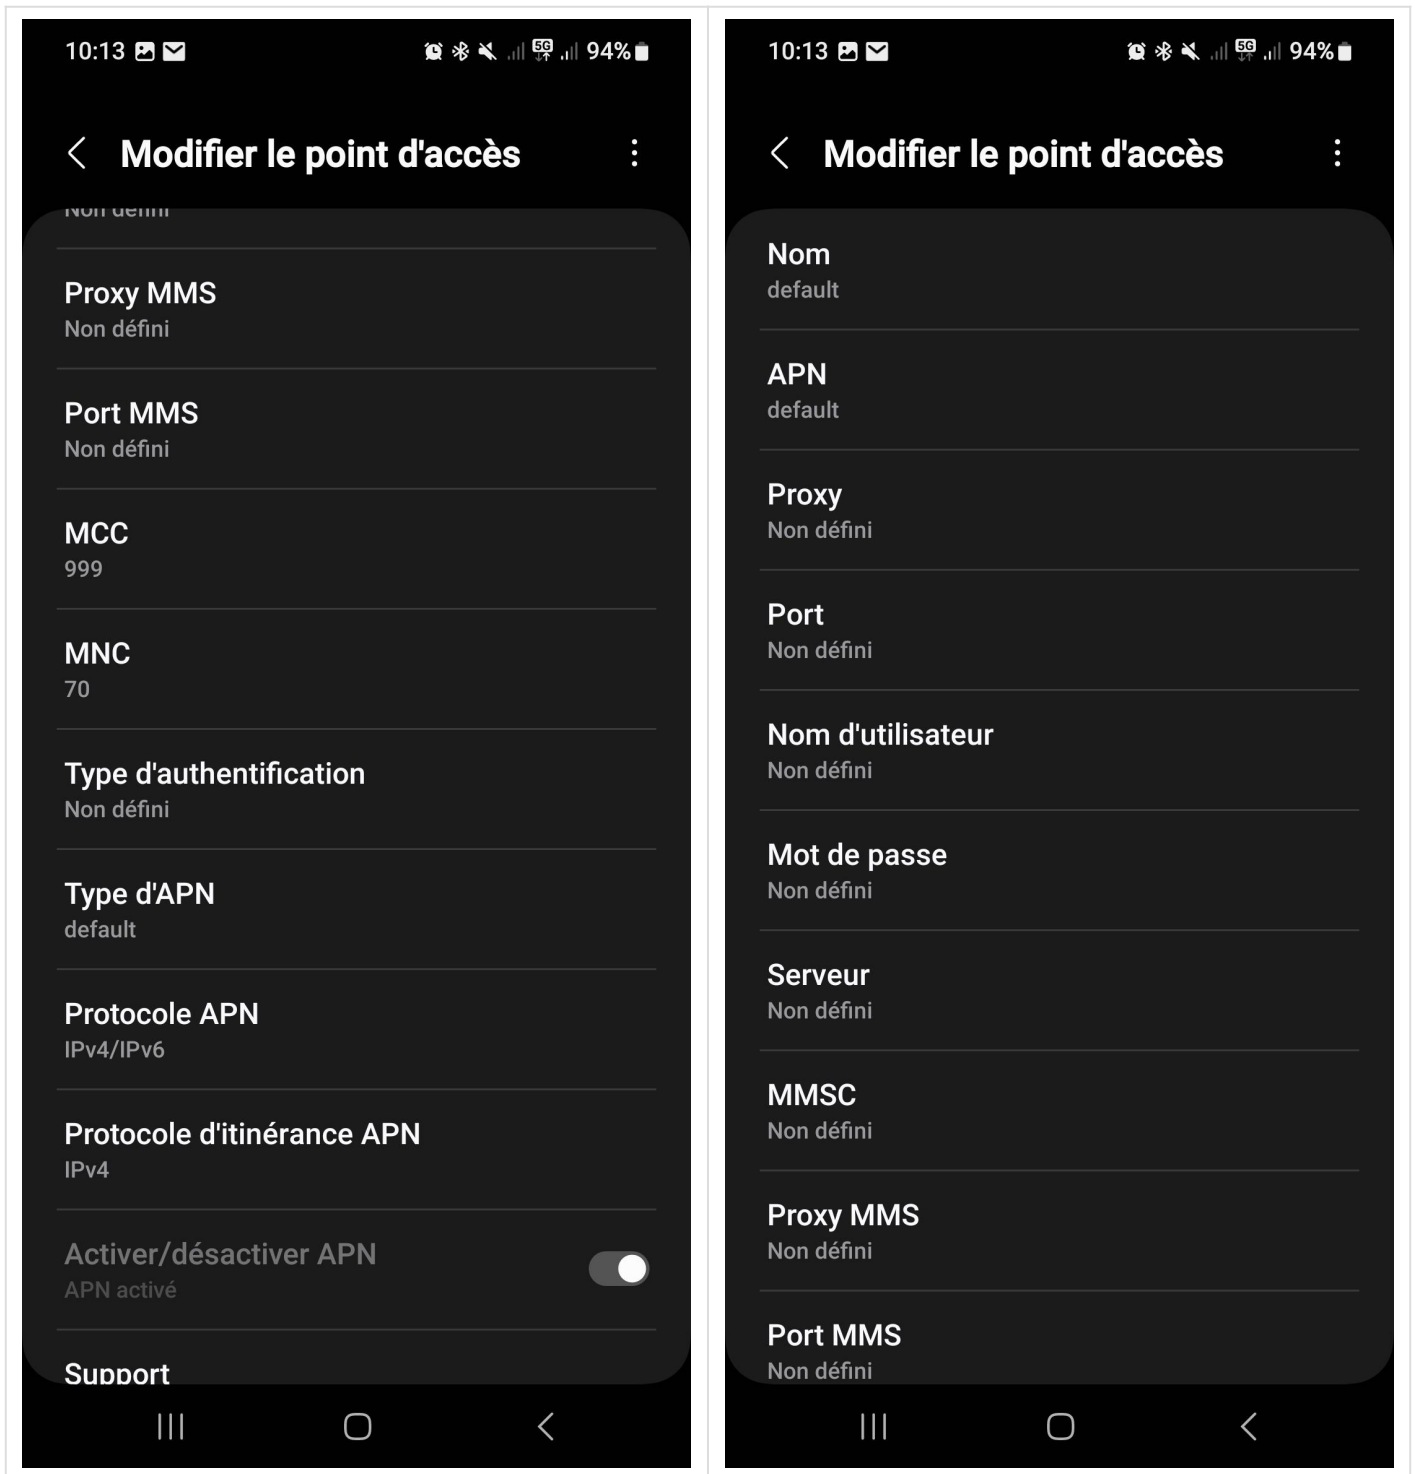

2. Go to APN settings:

Then tap on "**Access Point Names**"

3. Enter the following APN settings:

APN Name	default
APN	default
APN Type	default
